Drawings

An Official Draftsman has approved the drawings.

The information regarding the cultivar Saintlouis was described in the Plant Breeder's Right application number 20020230 filed in European Union on February 11, 2002 and published on April 15, 2002. The printed publication was accessible to the public more than one year prior to filing of this instant application. A publication relied upon as prior art under 35 USC 102(b) must be enabling. The text of the relied upon publications standing alone would not enable one skilled in the art to practice the claimed invention.

When the claim is drawn to a plant, the reference, combined with knowledge in the prior art, must enable one of ordinary skill in the art to reproduce the plant. See *In re Le Grice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could reproduce the plant from a publicly available source, then a publication describing the plant would have an enabling disclosure.

In the declaration, Applicant states the claimed plant has not been sold or available to the public anywhere in the world. The printed publication cannot be enabled because the disclosed cultivar has not been propagated from publicly available materials.

The specification provides a complete botanical description of the claimed plant. The completeness of the description is sufficient to distinguish this new plant from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
